

SPLX MK II vonGAL® PALLETIZER
Economics of motion and mechanics

It is the most popular palletizer in North America with over 1500 units in production. The SPLX MK II is the ideal palletizer for handling a wide variety of fragile packages, such as kraftwrapped bundles, bales and thin walled containers at full production speeds. **Rates up to 40 cpm.**

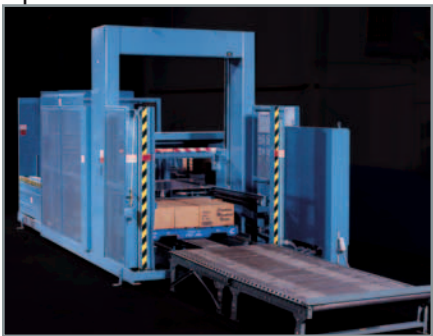

VG2200 vonGAL® PALLETIZER
Modular design and low maintenance

Designed for today's demanding requirements in a highly competitive marketplace, the VG2200 is based on a modular palletizing concept blending speed, accuracy and dependability. **Rates up to 60 cpm.**

Formula VG vonGAL® PALLETIZER
Clean, Smooth, Appearance

The Formula VG is a rakeless operation that is a low-maintenance, low-noise palletizing solution. It carries the respected legacy of vonGAL, a longtime leader in the palletizing world. **Rates up to 220 cpm.**

LOPAL vonGAL® PALLETIZER
Floor-level unit with increased accessibility

The LoPal is engineered to be user-friendly, and allows ready access for adjustment and maintenance of components at floor level. This robust design ensures long term reliability and low maintenance. **Rates up to 25 cpm (special high-speed version up to 40 cpm).**

HS4000B vonGAL® PALLETIZER
Industry's most versatile high-speed bag palletizer

The HS4000B is a unique design palletizer that utilizes continuous-flow without right angle movement. It's patented pneumatic plates form the most consistent loads promising the least product damage in the industry. **Rates of up to 60 bags/min.**

VK180PA vonGAL® PALLETIZING ROBOT
Innovative design makes automation easy

Developed specifically for high speed applications with heavy payloads, the vonGal palletizing robot is light, fast and powerful. It offers the strongest, lightest, toughest carbon arm in the industry. **Rates up to 15 cpm.** (More with multiple picks)
