

# Container Handling

Accessing parts and containers is one of the most significant productivity thieves in any manufacturing or assembly operation. Southworth container tilters improve productivity and safety by positioning baskets so that parts are easily accessible without bending, stretching, or reaching. Southworth offers more models and configurations of container tilters than any other manufacturer.

- Capacities up to 4,000 lbs
- AC or DC power
- Hand pallet truck accessibility
- Independent control of lift and tilt

For more details request our Container Tilter Catalog.

*In almost every case we've ever seen, production machines work faster than the people feeding them. Getting parts to machines faster not only increases worker productivity, it increases machine productivity, improving R.O.I. and shortening the amount of time it takes for production equipment to "pay for itself", while always improving the safety of the worker.*

## Handle Parts in Baskets

### E-Z Reach™ Portable

Our most popular tilter due to its versatility.

### E-Z Reach™ Roll-On

The most economical solution for most applications.

# or Totes Without Bending, Lifting or Reaching
