

# Pallet Handling

More items are shipped on skids or pallets than all other packaging methods combined. Loading and off-loading these pallets is always a backbreaking, time consuming job. Southworth PalletPal Products speed up and simplify the process, safely increasing the amount of goods that can be shipped or received every day.

Two decades ago, Southworth introduced the original PalletPal® Level Loader for manual pallet loading and unloading. Since then, the Southworth pallet handling line has grown to include:

- Spring and air actuated units
- Roll-On units for use with hand pallet trucks
- Turntables
- Mobile Levelers and Pallet Rotators

For more details request our PalletPal catalog.

*By maintaining a constant working height and nearside access as objects are added or removed, workers can build and break down pallet loads quickly and easily, while expending the minimum effort and avoiding the risk of injury. Rotators can further improve productivity and safety by eliminating nearly all manual restacking.*

## Load Pallets Quickly and

### PalletPal® Automatic Level Loaders

The automatic load levelers that started a revolution.  
Available in mechanical or pneumatic.

### Pallet Rotators/ Skid Turners

Transfer loads from one skid to another
