

Specialty Tables

Some lift table requirements fall outside the parameters of our Backsaver Line such as heavy loads, extreme load dimensions, high vertical travel and pallet jack accessibility.

In such cases, one of our Special Use Lifts can do the job nicely. In addition to the Backsaver line, Southworth manufactures a number of lift tables for specialized applications.

They include tables with:

- Extra long and extra wide platforms
- Increased capacity
- Extended vertical travel
- Hand pallet truck accessibility

For more details request our Specialty Lifts catalog.

Incorporating these special use lift tables into many applications not only makes a single worker more productive, it often allows one worker to perform tasks that normally require two. In either case, the work environment is always safer and more efficient.

Increased Capacity, Length,

Floor Height Lift Tables

Lowers to floor level for loading with a hand pallet truck.

Heavy-Duty Lifts

Lift loads up to 25,000 lbs. with ease.

Width, Vertical Travel and Pallet Jack Accessibility
